Gilead and Galapagos entered a collaboration granting Gilead options for ex-EU rights for anything coming from Galapagos' pipeline for the next 10 years in exchange for \$3.95b upfront, \$1.1b equity investment plus multibillion future milestones. In all, the deal seems like a total win-win for both parties where Gilead finally gets the late-stage pipeline and exciting R&D engine, and Galapagos gains a strong and committed commercial partner, who will help build Galapagos' own infrastructure, and desired independence from takeover attempts and financial markets, while further expanding the R&D to discover novel targets. Just reflecting the upfront, equity investments and the nearterm milestones and royalties on the proprietary pipeline in our model, without a potential commercial advantage from having Gilead as a partner, our PT goes to €180 (\$160 for ADR) from €135 (\$120). Galapagos continues to feature on our favorites list.

A bargain on rich terms

With \$3.95b upfront, ~\$1b in nearterm milestones (GLPG1690, GLPG1972, 1-2 Toledo compounds) and a 20-24% royalty rate for ex-EU rights (~60-70% of total drug sales), the deal values Galapagos' early stage pipeline beyond our wildest dreams (our est. €14/share or €710m ex-filgo) and the consensus (€5-30 per share) estimates for the pipeline. However, considering the depth of Galapagos' pipeline (e.g. ~10 compounds for fibrosis at different stages and at least 5 Toledo compounds) and the prolificity of the R&D engine (e.g. R&D in osteoarthritis, Hep B, NASH), and the plan to double the R&D platform, Gilead got a bargain in the long term.

- Equity investment: Gilead will invest \$1.1b for 12.4% of Galapagos' shares at €140.59 (20% premium to 30d VWAP). In addition, Galapagos intends to grant Gilead 2 warrants to increase the stake to 25% at €140.59 for 1 year and to 29.9% at 30d VWAP+20% premium for 10 years. In return, Gilead agrees to 10-year standstill not to increase the stake beyond 29.9%. Gilead will appoint 2 Board members to Galapagos, including Dan O'Day.
- **\$3.95bn upfront** to be recognized over 10 year period.
- General terms: For the next 10 years, Galapagos will develop programs till the end of phase II, after which Gilead has an option to in-license the compound ex-EU. The further development cost will be shared equally. Galapagos will be entitled to \$150m milestones per compound and 20-24% royalty rate, which is rather a rich term considering that most of the programs in question have not reached proof of concept.
- GLPG1690 in IPF: Full rights on the compound ex-EU, 50/50 cost split on the ongoing phase III + \$325m milestone on the approval in the US.

GLPG1972 in osteoarthritis: Option on US rights (n.b. Servier owns ex-US rights), 20-24% royalties, \$250m licensing milestone, a \$200m milestone on data in phase IIb (H2'20, our guess some effect on pain and function) + \$550m in regulatory and commercial milestone. Given the commercial potential of the disease-modifying drug in osteoarthritis (could be easily \$4b+), the extra milestones seem just.

More of filgo

Kempen

While the general terms of the filgo agreement remained unchanged: 20-30% royalties ex-EU and 50/50 revenue split in EU5 plus the Benelux, Galapagos will now participate on more equal grounds in European commercialization (exclusive in 3 countries in RA and 2 on IBD), thereby creating the platform and infrastructure for the following pipeline assets (GLPG1690 in 2023, GLPG1972 in 2025). The cost-sharing shifted to 50/50 from 80/20, but with large RA trials completed and IBD approaching completion, the remaining trials in AS and PSA should not be too much of a burden for Galapagos and could be covered by filgo revenues coming in from 2020.

Independence from capital markets and takeover

While the collaboration implies close scientific collaboration between the company, Galapagos retains complete independence in the selection of target and disease area and development till phase III. Moreover, all compounds not picked up by Gilead would revert to Galapagos in full with no ties. With ~\$6b cash inflow in the coming years and the 50/50 R&D split, Galapagos is sufficiently funded to accelerate the pipeline (e.g. 8 trials for Toledo planned next year, more fibrosis compounds going to POC) for the next 5-7 years. Whereas, Gilead's involvement and the standstill would preclude any takeover attempts.

PT to €180/share

We update our model for: i) the initial equity investment (ex-warrants), ii) the upfront recognized over 10 year, iii) higher R&D split for filgo R&D, iv) milestones and royalties for GLPG1690 and GLPG1972, and iv) higher unallocated (i.e. excl. phase II programs) R&D spend from €250m/yr to €400m for the next 10 years. As a result, our PT increases to €180 mainly driven by cash infusion and better than expected terms for GLPG1972 (to €12/sh from €3) that compensates the decrease in valuation of GLPG1690 (to €6/sh from €12).

Galapagos - Company Profile

Company description

Galapagos is a biotechnology company that carries out small molecule drug discovery in a number of therapeutic areas. The company's research and development activities are based on novel drug targets identified using Galapagos' unique proprietary target discovery technology.

SWOT analysis

Strength

Kempen

Filgotinib is potentially best in class JAK inhibitor with a strong partner in blockbuster indications

Broad proprietary pipeline

Unique, proprietary target discovery and validation capabilities

Opportunities

Initiation and progress of new drug discovery programs against first in class targets

New partnering deals

Weakness

Early-stage product pipeline focused on novel targets results in high risk drug candidates

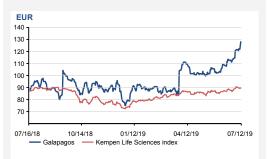

High competition in inflammatory indications

Threats

Clinical failures

Litigation/Infringement

Sustainability screening

All companies under research coverage by Kempen are systematically screened on ESG (Environmental, Social, and Governance) issues by GES Investment Services (www.ges-invest.com). Kempen uses internationally-accepted standards as the basis for engagement efforts. In that respect the UN Global Compact offers a globally-recognised framework for environmental, social and governance policies and practices. We have extended the list of UN conventions and treaties to a comprehensive set of guidelines that is relevant for global investment. Alleged violations of international conventions will lead to Kempen Research to establish a dialogue (engagement) with the company.
